PROFESSIONAL SUMMARY

Software Engineer with 2 year of experience in client-facing service-based projects, specializing in developing and enhancing enterprise applications using React, Node.js. Proficient in JavaScript, REST APIs, and Microservices architecture, with hands-on exposure to Agile methodologies, Git, and Cloud platforms. Skilled in delivering scalable, high-quality solutions by leveraging modern engineering practices and AI-driven approaches.

WORK EXPERIENCE

ASCENDION – Engineering to the Power of AI — Senior Associate Engineer - Experience Engineering

June 2024 - Present

1year 9months of experience in a client-facing, service-based project.

Developed and enhanced web applications using React, Node.js.

Collaborated with cross-functional teams to deliver scalable solutions, improving client workflows by reducing manual effort.

EDUCATION

Bachelor of Technology - Computer Science and Engineering,

VEL TECH RANGARAJAN INSTITUTE OF SCIENCE AND TECHNOLOGY

2020 - 2024

CGPA : 9.0.

Intermediate - MPC,

NARAYANA IIT ACADEMY

2018 - 2020

CGPA : 9.2.

SSC

SRI CHAITANYA TECHNO SCHOOL

2017 - 2018

CGPA : 9.8.

SKILLS

Frontend: React, Redux, Material UI, Bootstrap, Next.js, Angular, Responsive Web Design

Languages: JavaScript, TypeScript, SQL

API Integration: REST APIs, GraphQL APIs, Async/Await, Error Handling

Problem solving Techniques: Data Structures and Algorithms

Tools: Git, GitHub, Jira, VS Code, Postman

Testing: Jest (Unit Testing), Cypress, Playwright (E2E Testing)

Cloud: Power Apps, Google Cloud Platform (GCP)

Methodologies: SDLC, CI/CD, Version Control Workflow (Gitflow)

PROJECTS

Project: CODE BRIDGE (Client Project)

Role: Frontend Developer

Tech Stack: React.js, JavaScript, HTML, CSS, REST APIs, Git, PingFederate, CI/CD

- Developed a scalable web-based platform for **code modernization**, enabling features such as **Code Conversion**, **Code Discovery**, and a **Prompt Builder** to streamline engineering workflows.
- Implemented automated migration pipelines to transform Teradata, SQL, SAS, and Python code into **BigQuery SQL and Python**, with real-time execution tracking and GitHub integration.

- Designed and developed interactive dashboards and workflows for **code analysis, lineage tracking, and visualization**, improving system transparency and developer productivity.
- Integrated enterprise **CVS Health SSO authentication using PingFederate** to ensure secure access and centralized identity management.
- Collaborated in an **Agile Scrum environment**, participating in sprint planning, daily stand-ups, and retrospectives to support continuous delivery and team collaboration.

Project: USER DATA MANAGEMENT SYSTEM (UDMT) – Client Project

Role: Frontend Developer

Tech Stack: React.js, JavaScript, HTML, CSS, REST APIs, Git, SSO, CI/CD

- Developed a **role-based User Data Management application** for CVS Health to efficiently manage and monitor user records.
- Implemented features for users to **create, update, and delete records**, which are routed to approvers for review, approval, or rejection to maintain a structured data validation workflow.
- Built **role-based access control** supporting Admin, Approver, Update User, and Inquiry User roles, with Admin managing permissions and user access.
- Developed a **dashboard module** displaying daily updates and recent activity logs to improve visibility and monitoring of system operations.
- Integrated **Single Sign-On (SSO)** authentication, implemented REST API integrations, and contributed to **CI/CD pipeline processes** for streamlined deployment.
- Worked within an **Agile Scrum framework**, contributing to sprint planning, stand-ups, and retrospectives to ensure timely feature delivery.

Project: HR Employee Management System (Internal Project)

Role: PowerApps Engineer

Tech Stack: Microsoft Power Apps, Power Automate, Microsoft Bot Framework, Azure AD (SSO)

- Developed an internal HR management application using Microsoft Power Apps to manage and track employee information across multiple locations.
- Designed an interactive dashboard with graphical visualizations and filtering capabilities to analyze employee distribution across different locations.
- Implemented dynamic tables with advanced filtering options to enable HR teams to easily view and manage detailed employee records.
- Built reusable components and automated workflows using Power Automate to streamline HR processes and improve operational efficiency.
- Integrated Single Sign-On (SSO) authentication and implemented a Microsoft chatbot trained on application data to help users quickly retrieve employee details through conversational queries.
